MESSAGE FROM THE PRESIDENT --

As I start my term I am excited about the opportunity to work for our amazing local section and keep up the legacy that is the Lehigh Valley American Industrial Hygiene Association. I would like to thank Bruce Allen for his respectable term as President for the 2006-2007 year. In addition, I would like to thank Joe Gentile, Diana Barrett, Blake Morris and Tim Docherty for serving another term.

Our schedule this upcoming year includes great topics and speakers with breakfast and dinner meetings, updating our website to enhance member's access and registration, a holiday social and a plant tour. In August, we have a meeting scheduled that will include two great topics being Pipeline Safety--Security and Terrorism and the Department of Homeland Security New Chemical Safety Regulations. Registration details for this are included towards the rear of this newsletter. As always, we plan to have our annual Professional Development Conference and IH Conference in the Spring.

The board's goal for the upcoming year is to market the industrial hygiene profession to other professions that may benefit from what our local section has to offer. For instance, we plan to have sessions on topics such as Methamphetamine Laboratories and Pandemic Influenza. These topics may appeal to professions such as: law enforcement, physicians, and other emergency responders. We encourage you to forward our meeting information to those who may benefit from the information.

The Chapter exists to serve its members!!! We encourage input on topics and speakers that are wanted in the profession as well as feedback on the types of topics that are currently being offered.

Your continued support in our local section is greatly appreciated. Hope to see you soon!

Jennifer Brown President

American Industrial Hygiene Association

Lehigh Valley Section

TBA = To Be Announced

Local Section Member Elected on the Board of Directors

Local section member Daniel H. Anna, PhD, CIH, CSP has been elected to the National American Industrial Hygiene Association’s Board of Directors. Dan serves as an associate professor and Occupational Safety and Environmental Health Program coordinator at Millersville University. Dan is a good friend to the chapter and always has informative feedback to the association and has presented on several Industrial Hygiene topics at our meetings. Dan attended the Future Leaders Institute in 2005 and serves on many committees including the Student and Early Career Professionals Committee. In addition, his enthusiasm for the profession has inspired many peers to volunteer and get involved. Dan will be our sections Board Coordinator which I am confident will be a great experience. On behalf of the Lehigh Valley Section of the American Industrial Hygiene Association, I would like to congratulate Dan Hanna for this impressive achievement.
