

Comprehensive Industrial Hygiene Review: February 16 - 20, 2009
Minneapolis, Minnesota
\$795.00

Sponsored by the Midwest Center for Occupational Health and Safety
A NIOSH-Sponsored Education and Research Center
University of Minnesota School of Public Health

The Comprehensive Industrial Hygiene Review is designed to provide an intensive review of a wide range of industrial hygiene topics, focusing on preparing practicing industrial hygienists for the ABIH Certification Examination. Comprehensive coverage of the technical rubrics of industrial hygiene is provided by practicing professionals. The presenters, each of whom are experts in their field, will help students organize large amounts of data to correctly answer exam questions. Industrial hygienists seeking a comprehensive review of the entire field are also encouraged to attend as well as other professionals interested in enhancing their knowledge and understanding in the fundamentals and concepts of Industrial Hygiene. A basic understanding of the field is presumed, as well as basic skills in mathematics and chemistry.

Application has been made to:

American Board of Industrial Hygiene - Certification Maintenance Points (CMs)

5.0 Industrial Hygiene CM Points

Board of Certified Safety Professionals (BCSP) - This course is designed to meet the criteria for Continuance of Certification (COC) as specified by the BCSP.
